

TITLE

First Author¹, **Presenting Author**^{2†}, and Third Author³

† presenting.author@email.address.com

1. Institution address of first author
2. Institution address of presenting author
3. Institution address of third author

Here is your explanation of your work and why it is interesting. It is aimed at an **interdisciplinary audience**, ranging from researchers working on fundamental questions of quantum information, to researchers working on practical improvements in enabling technologies (such as electronics or cryogenics). It could open with **questions** to researchers from the other communities.

- ◆ This whole abstract should **not exceed 1 page**.
- ◆ It can include a figure.
- ◆ If the abstract is only text, it should probably not be longer than about 2/3 of a page.
- ◆ When you submit this abstract:
 - You must be logged in to submit: [login here](#) & [account creation here](#)
 - Please select a **topic** to help us organize sessions; [see the list on the website](#).
 - You should ignore the option of uploading *supplementary data*.

This last paragraph can be more technical [1], giving a few selected details for experts [2].

References:

1. Please cite your paper or preprint here (including its title), so interested readers can get more information. A clickable link to an open-access version is preferred.
2. If your work is in preparation, please cite one or two other works to indicate its context and methodology. However, if your work is already available online (with its list of references) then there is no need for this.
